Art Unit: 1755

Claims 1-37 of this application conflict with claims 1-17, 19-24, 26-30, 34 and 37-43 of Application No. 10/767549. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-37 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17, 19-24, 26-30, 34 and 37-43 of copending Application No. 10/767549. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims fully encompass those of 10/767549 differing only in the pH ranges of claims 21-23 the variability of which falls within the scope of "about" as used in both sets of claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18, 20, 22-24, 26-29, 32 and 36-41

Art Unit: 1755

of U.S. Patent No. 6881008. Although the conflicting claims are not identical, they are not patentably distinct from each other because they differ in that the patent claims require a pH adjustor not required, but not excluded, from some of the instant claims and the instant claims include a fibrous material. Claims 24 and 25 of the patent show that the addition of fibers is clearly envisioned in the invention claims. The portion of the patent disclosure upon which these claims rely, column 8, lines 34-41 and examples 2, 4, and 6 explicitly address the issues of the particular fibers used in claims 18-20, thermally treated wood fibers and newsprint.
